Q150 Teaching Resource

This resource is provided by Countour Eduction

Part Three

You are now going to work in pairs to make predictions about how Queensland will look in the next 25 years, in 2034. Consider the changes that have occurred in your lifetime and the changes that you have noted as you have completed the activities in this resource.

Firstly, complete a mock annotated field sketch that depicts a typical Queensland household in 2034. You should note down at least five features of the household that identify it as being in the future. You should place a border around a full page in your notebook to complete your field sketch.

Look at the field sketch you completed in the Social section of Part One of this resource. List the main differences between Queensland in 1860 and Queensland nearly 200 years later.

In your notebook, select which time (1860, now or 2034) you would rather live in. Write a paragraph response that outlines your selection and provides three reasons as to why you would prefer to live in the period of time.

In the spaces below, make three predictions for each of the areas listed. Think about what Queensland will be like in each of these areas and make a bold prediction for the future.
